Welcome to Life After Life Channel, where we delve into the profound theme of the "end" - an exploration of life's closeness and transitions. Join us on a journey to gain a deeper understanding of the intricacies and meanings of life through a unique perspective on endings and new beginnings.

Transcript

Capitalism is not a part of the golden future. What is happening to the United States and the big nations in this current timeline and in this shift? Well, isn't it interesting that what appears to be we're moving forward and yet there appears to be stuckness in certain places and going backwards.

And in fact, it's part of the knocking down of the old kitchen.

[Music] Hello everybody. I'm Diana. It's lovely to be here again talking to you. How do I get messages? Well, normally they drop into my

mind and then I have to discern if that's right and where they're coming from. Sometimes I see the being whether it's my guide or an angelic being and I have a sense of the energy of it. For example, when the unicorns first came to me, I was sitting on the patio just typing away on my laptop and this energy appeared behind me and I thought, "Oh, what's that? It's not an angel." So, I sat very quietly and felt it and it was a pure white energy. And then it just dropped into my head.

We are the unicorns. And so that's how I work. Angels guide us in everyday life every second. Everybody has a guardian angel. When you become fifth dimension, a second angel, a second guardian angel is allocated to you, but you always have at least one. Now your main guardian angel stays with you throughout your lives. Not just this lifetime, but it stays with you in between lives.

Wherever you go, if you move from this life to another universe, another planet, or you stay in the inner plains, your main guardian angel is always with you and loves you unconditionally. It doesn't matter what you do, your angel still loves you. I remember a teacher saying to me once that this little boy who couldn't do maths in her class, he could not add up the sums.

And she said to him, "Don't worry, your angel loves you." And he said, "She loves me even though I can't do my maths." and she said yes. And this little boy was so pleased to know that he had an angel with him that loved him unconditionally. So your angel is always with you. Now we can see angels as orbs. An orb is a circle and they appear in photographs. And so if you see an angel orb very, very close to you, then maybe you're uncomfortable, maybe it's really helping you. If you're happy and relaxed, you will see your angel, your guardian angel orb on the wall in the distance because it can be with you in a fraction of a second.

So your angel then you see this in the orbs might be over your mouth and it's helping you to speak your truth or helping you to say something kind or it may be here and then it might be helping you to see things differently helping you to look at things from a much higher

perspective. Now, your angel saves you if it's not your time to die. So, it'll just push you away if you're going to be involved in an accident. Of course, if your soul decrees that you need that accident or that it's your time to go, then your guardian angel can't stop it from happening. But your guardian angel is with you holding your hand while you go through challenges. So people say, "Where was my guardian angel when this happened?"

And the answer is right with you, holding your hand, helping you to deal with the situation, helping you to get over the trauma. He's very, very close to you. Your guardian angel arranges for you to meet the right people. So if you are looking for a job and suddenly you open the paper or laptop or whatever and there's the perfect job for you, your guardian angel has coordinated it. So your guardian angel arranges all the synchronicities, all the coincidences, all the meetings that you have and you can ask your guardian angel. People underestimate the power of asking. Whatever you need, ask.

And if it's for the highest good, your angel will bring it to you. If it's not for your highest good, then your angel won't bring it to you. But why would you want it if it's not for your highest good? So your angel is always there bringing into your life what you need. Now it's quite interesting talking about this because people think that they can just demand something. The law of prayer or asking is that you ask sensibly. You ask if you're having an it's like a some people are like children like toddlers and they say I want this. I want that. Why can't I have this? Why can't I have a Why has my husband left me? Why can't I have a nice boyfriend? Why can't I get a different job?

And that's not asking. That's being a toddler. So asking is staying centered. Asking from a calm, clear space. And that's when your angel works with you for your highest good. Now the other thing of course is like when I had my first angel experience and I was in the depth of despair. If you're at rock bottom and you then call out to the universe that is a different energy again. So there are two things you ask your angel calm centered or it's much better not to get into the

depth of despair, but if you do so that's when an angelic being will come in and respond to you.

So you are surrounded by angels. When I first started my journey, I went on a weekend workshop and I was staying in a little guest house. I didn't know that the woman who ran it was a medium and she saw angels. So the first day I went off to the workshop and the next day she said to me before I went, "You came in with lots of angels yesterday. They were all around you and you went off and you left them here with nothing to do."

And I was amazed. I a didn't realize at that point that I was surrounded with angels and secondly I didn't realize that unless you ask the angels to do things and you send them out that they just have to sit there unemployed and wait for you to ask. So send angels out, ask for them to help people. Ask them to do good things. Ask them to raise the frequency. Ask them to help the animals.

And if we use our energy in that way, then the world will change and your life will change. When you work with the angelic realms, everything starts to change in your life. One of the things that's changing is organized religion. Now, it's based on an old third dimensional paradigm of one person taking responsibility for the lives of others and telling them how to get to source. The new is where every individual takes responsibility for themselves.

So, each individual climbs their own spiritual mountain to the top. So the old dogma in religion is going to dissolve. There are many beings in the spiritual plains who are helping to drop the thoughts of the new into the minds of people who have got dogmatic ideas and as soon as that disappears and dissolves then those people will climb a spiritual mountain. Religion is being replaced by spirituality. So in the future we are going to resolve conflict very differently both in societies and in individuals and everywhere on the planet because in the fifth dimension people are working for the highest good without ego. All conflict is based on ego.

And so if you've got two people or two countries with egos, then they want to be the winner. They want to be the top. They want their own way, not what's for the highest good. If you have a group of people coming together, as they will in the future, they will state the problem. They will meditate for what is the highest good and what's the highest good is right for everything and then the solution comes out automatically from that and everybody is happy because everyone wants what is for the highest good. So when you take ego out of a situation then the highest good can evolve. Now, of course, what I would like to see for Israel and Iran is exactly that taking place. People sitting down, leaders sitting down, letting go of ego and saying what would be the very best for our people and the land.

And as soon as they do that and everybody lets go of their own stuff, then they can work out a solution. And remember, many of those people have reincarnated to be in that situation, in that conflict, because they were on the other side in their last incarnation. And they are learning to resolve their ego so that everyone can come out of it for the highest good. And in all these countries there are some very highly evolved beings incarnating or have already incarnated who are starting to hold the energy higher.

When enough people in those countries and in the world hold peace in their hearts, peace has to take place. So what I'm saying is that every single person can make a difference. If every individual resolved their own conflicts in the same way, then the conflicts around the world would just dissolve in peace. What is happening to the United States and the big nations in this current timeline and in this shift? Well, isn't it interesting that what appears to be we're moving forward and yet there appears to be stuckness in certain places and going backwards.

And in fact, it's part of the knocking down of the old kitchen. Going back to that analogy, you knock things down in order for the new to be built. And although it's uncomfortable, it's difficult, it's ridiculous in so many ways, it is also going to bring forward the new. It's like you're sitting there discussing what is the design for the new kitchen.

Someone comes in with a big ego and says, "I'm going to do it my way." But then everybody gets together and says, "No, that's not right. We're going to have this design for the kitchen." and the big egos are swept away and the perfect kitchen eventually evolves. But we're going through a process on Earth.

And the other thing to say is that as the frequency goes up, these huge countries with lots of states are not going to be huge anymore. There's going to be autonomy in each of the states. So, you're not going to have one person ruling a whole continent. It's going to be small groups taking responsibility for their own areas and that's all over the world on every continent. the small is going to come back. And then as we move into oneness, which is the highest frequency of the higher heart, that's when we know we are all one. Then you won't have the barriers.

You people will be able to travel freely. At the moment, we're going through that period of stuckness. People can't travel. You have to have a visa for here. You have to have a passport for there. In the new paradigm, you will not have visas. You will not have passports. You will not have hard boundaries. You will be welcome wherever you go because we are one. There's no separation. Some of these things are very hard to understand. In our current consciousness, it's a consciousness shift that is going to move the world. Capitalism is not a part of the golden future. Again, it's quite difficult to understand how the consciousness is going to shift and we are going to have abundance.

Capitalism creates separation. It also creates pyramid structures. Pyramid structures will be swept away in the rising tide of the higher frequency coming in. So in the new it'll be consensus and when people meet to take decisions for the highest good then you don't have a result where some have and some have not. Everything will be valued differently. Creative endeavors will be valued. People working for animals, children, the planet, nature, that will be valued. What will be valued is soul happiness, soul contentment, joy. Now remember in the new paradigm when the shifts have fully taken place

and our planet is fifth dimensional it's radiating out an energy that draws in abundance. People will not have to work. Every individual will be abundant, will create an abundant reality.

And so when all your needs are met, then you can express your creativity, your artistry, you can write, you can do what gives you joy, you can play sport. You don't go to an office. You are not a slave to make somebody else money because every individual will have their own individual abundance. Now when the new paradigm is fully in and people have restored their latent gifts, when the 12 strands of DNA are in and fully activated, then whatever you need comes to you. You think, "I would like a feast for my family and friends."

And a feast is manifest for you. It's there. You don't have to say, "Oh, I've got to go to the shops and buy it." Whatever you want is delivered to you. It's an automatic process. If you need a vehicle to take you somewhere, you think vehicle and the appropriate vehicle appears for you. Whether it's a mini helicopter, a silent millie helicopter that doesn't need that is ecological. Remember, the fuels of the future are going to be plant-based.

And so the new free energies are going to come from sources that we're not even currently aware of. Not just plant-based, not just the tides, because the oceans have huge untapped sources of energy, but lightning, thunder, they're all sources of energy that we not using at this moment. We're just using the wind and some water. But it's basic in comparison with what is going to come in for the future. So we will be traveling at speeds faster than sound, much, much faster. Everybody will travel at huge speeds. You know thought travels in a second and we will be doing the same.

And so it's an almost impossible to comprehend paradigm that we are moving into an abundance of peace. If you just think how much of our energy and resources is used up in conflict and you think that that's all available for happiness, for harmony, for creativity, then you have some idea of how we are going to be in the future. Has Atlantis already been found and what did we learn from it? Atlantis was a civilization that lasted for 260,000 years. It was a cosmic era. In that

time, Atlantis rose and fell five times. It was an experiment on Earth that ended in 2012. In that 260,000 years, it was only at the last time that Atlantis rose that the golden era emerged and that lasted for 1,500 years. So that is the legendary era. It's the time people talk about. But of course, Atlantis was fast. When the experiment was first brought forward, it filled the Atlantic Ocean.

And so that was a huge, huge continent. Each time people went dark, they became very third dimensional and the experiment was terminated by flooding. And so each time it came back it was smaller. The last time it was only five islands across the Atlantic. And yes, the parts of it are coming have emerged. Parts of it are still where it originally was, but hasn't gone under the ocean. Most of it is under the ocean now. You can still see parts of it. The road to Biminy. There are little bits of Portugal, the Azors that are parts of Atlantis that were there.

But in the main it has gone down and what is now emerging is the consciousness of the golden era which is the foundation for our next step into the new golden age. Now in the golden era of Atlantis everyone had their 12 strands of DNA fully operational and activated. This meant that they had awesome gifts and talents, things that we have not retrieved yet. Everyone was telepathic. Everyone could communicate. Everyone saw auras. Therefore, everyone was totally honest because you knew exactly what was going on.

They had awesome methods of healing. They were able to regenerate, rejuvenate. They were able to some of them well they could all levitate and move things. If you saw an apple on a tree and you wanted it, you just send a thought out to the apple and you brought it down for yourself. You didn't climb a tree. Now that was an ordinary and everyday gift that everybody had. There were, of course, the magi, highly advanced priests who could perform what we would now call magic, but who could fly, who could levitate and who could move themselves up a mountain.

And so that there were many, many high gifts as well. And then of course that golden era of Atlantis reached a peak and at that point

one of the magi had a dark thought and thought oh instead of sharing I can use this power for myself. As soon as that happened the civilization started to decline and it went down very rapidly. And it's interesting that we are now going up very rapidly into the new golden era. I must say one more thing. Golden Atlantis grew on with fifth dimensional people on a third dimensional planet. We are now moving to be fifth dimensional on a fifth dimensional planet. So we will have much we we're just going to go much, much, higher than they did in the golden era of Atlantis. It's awesome what we have to look forward to. Should we fear artificial intelligence?

Now this is a very interesting one, isn't it? There was a time when electricity came forward and people were frightened of it and they'd say, "Oh, I'm not having that nasty electricity in my house. I'm not having electricity everywhere." because they didn't know how to use it. But eventually people harnessed it, came to trust it, and used it to light their houses. Now like anything it can be used for harm, but people mainly use electricity for good. Now we have evolved to the level where we can take in AI. We can accept AI. It's been given to us because humanity has reached the level where we can deal with it.

And so we can use it for harm or we can use it for good. And as the frequency rises, we will more and more understand it and use it for good. Currently, it's a scary proposition, but as the frequency rises and people see its potential and know how to use it, then it will be used by humanity for humanity and so it's not to be feared. The more you fear something, the more you give it power instead of saying, "Right, we can use this now to help everyone."

And remember, as we evolve, we are growing, cultivating, accessing with the frequency raises crystalline brains. crystalline body and crystalline brain. In the old 3D paradigm, we could carry very little light. Our carbon-based bodies do not carry much light. So, we are evolving as our frequency rises. Crystalline bodies, crystalline brains that will be able to use AI in a much, much healthier and better way. Don't fear it. Just know that it can be used for the highest good. Can AI connect with spirit or interact with other realms? No. It's artificial.

It's a robot. It's a computer. What is one truth that humanity has collectively missed or ignored for too long? Oh, I suppose the one truth is we are all one. You know that you can't hurt someone else without hurting yourself. You can't hurt yourself without harming someone else.

And that if we recognize that everything would very quickly go into peace. You can't judge another without judging yourself. There is not because we are literally all one. And so training ourselves to let go of the judgment and the control is going to bring us back into that oneness. I've got a little story about that. Just a friend of mine was walking in a beauty spot and there was litter everywhere and she was thinking all these judgmental thoughts about people who drop litter and this voice came to her from nowhere and said, "And what about the psychic litter you're leaving with your judgmental thoughts?" Whoa. I mean that was such an awesome thing. It literally changed my thinking when she told me this story. I thought, "Wow." I mean, just literally for litter, every time I see a piece of litter, I send a blessing to the person who dropped it. I bless them with self-worth and a sense of belonging, because if you have self-worth and belonging, you don't drop litter because you're one.

And so that is a start that people can do. But then you apply it to everything. Whoever we're judging out there, whether it's a president or your next door neighbor, it's harming the planet and each other. And as we bring that back to ourselves and just hold the energy of love, then we have the truth of being on earth. How can we best prepare spiritually and practically for what's coming? Spiritually is easy. It's watching every thought, every word, and every action. Just watch it. Make sure it's for the highest good.

To communicate with the angelic realms, it doesn't matter if you can't see them, just talk to them. They're there listening to you.

So, whatever you think or say, your angel is there taking that thought from you to help you. So, make sure it's all positive. Make every single thing positive. Now, what you can do on a practical level, talk to your neighbors, smile at people. Absolutely know. Oh, and of course,

there are things like looking after your body. The guides are coming in more and more now saying, "Make sure you drink pure water. Bless your water. Make sure you eat good food. Choose food that does not have sugar or excess salt in it. Choose food that's fresh and natural and organic wherever you can. Make your body purified and right.

And those are preparing us for the new golden age. Be very practical. Keep your body healthy and flexible. Walk, do exercises and do flexible exercises, fresh air, walk in nature. Why would a soul choose to experience a difficult life, a challenging life? There are lots of reasons and this is particularly applying to nowadays because this is end times. Everything has to be cleared on the planet by 2032 because we are then moving into a new frequency. There's a new blueprint for our planet, a new experience for Earth. We're actually on the cusp of a new civilization.

So a soul might choose a difficult life because it's repaying old karma and so they are undertaking it, but not just their own karma because this is end times. We have to clear everything for our families. I mean souls have come in for some really challenging things now. So in the past you could say if you didn't want to finish your karma you'd say no and then you have you couldn't you didn't undertake your family karma. But if somebody dies, they haven't completed their karma and their children, if they've no children, their nieces, their nephews, cousins, undertake it.

And you could decline it. You could say, "No, I'm not taking on my grandfather's unresolved issues. I'm not taking on my great greatgrandfather's stuff." But now because it has to be cleared by 2032, people had no option. So many souls have been clearing out stuff for other people, but not just people, for countries for and taking on genetic stuff because it has to be cleared. Now that is beginning to end now. and the karmic issues are coming to the end. New souls coming in, babies being born are not bringing that in anymore.

But the souls that have been alive in the last 50 years, they have been taking on and clearing this for humanity and for the planet. So that's one reason a soul would choose a difficult life. Another is they

really want to test themselves. They want to test at a soul level. Nobody wants to do it in a physical body. But if your soul says, "Look, see if you can pass this challenge." It's like a test at school. See if you can do your exam and then you move to a higher class.

And it's exactly the same on Earth. And because this is a time when the entire planet is rising in frequency so quickly beyond anything that was ever expected, souls are saying, "Yes, I'll do that next exam. I'll move on while I have this opportunity." Extra teachers are coming in to help us. All sorts of higher energies are coming in now so that we can make a difference. We are living in the most extraordinary time that there has ever been in the entire history of the planet and it is the greatest opportunity for soul growth that there has been ever.

And when you think of that, you think, "Yeah, of course people will come in now, however challenging, because it's going to get them fast track to university in the inner planes. Do planets reincarnate like souls?" No. Planets don't reincarnate. Planets are part of a universal energy. Planets are chakras. So your chakra doesn't reincarnate. It grows. It expands, but it doesn't pass over and come back. But planets of course are part of the rise in frequency that started in 2012 when source energy touched the heart of every sentient being, every planet, every star and started a journey up to a higher dimension. So the planets are rising in frequency, but they're not reincarnating. Earth seems very chaotic at the moment because of what is going on. From a higher perspective, it looks as if we are clearing out old stuff.

And this is very necessary if you want to have brand new wardrobe, you clear the old out. And that's just exactly what's happening. You know, if you want a new kitchen, you have to go through the process of the old kitchen being taken out. So, the cupboards are knocked out. Everything comes out of the cupboards. It's chaos. There's dust everywhere. But we're not just having a new kitchen. We're having a whole new extension. So, it's being built. A new extension is being built on if you like that analogy.

So that it's an amazing time of destruction for the construction of the brand new and we are just starting the construction process now, but

we still got to clear out. So for instance many big businesses are well almost all big businesses are part of the old kitchen the old paradigm. They have to be cleared out so that they are ready for the new to come in. The new paradigm is people working cooperatively, people working for the highest good, people doing what gives them soul satisfaction. It's also about smaller, not huge owning everything and controlling and dictating.

And one of the things that we can do right now to help is to call in the violet flame of transmutation and ask it to go into every big business and start clearing out and transmuting the old so that the new paradigm can start to come in. What's happening on Earth is part of a huge awakening process for the new civilization that we are creating. These huge schools, they were built for the egos of politicians. Huge hospitals, they're not healing places.

Everybody knows you go into a hospital, you can't sleep. It's noisy. It's not gentle and quiet and healing place. The new will be small healing centers using non-invasive techniques that nurture the body and bring us back into balance. In the golden era of Atlantis, there were no hospitals. What you had was a place that you went to for your chakras to be rebalanced so that you could be whole at all times. If you had an accident, then you would go to a healing space and healers would work on you. But they had techniques that we have lost to heal the wounds, reset limbs, even regenerate.

And so that is just beginning again now as we start the buildup to the new. We are extraordinarily blessed to be here right now. Okay. It's been really lovely talking to you and answering questions. And I just want to say that you are important. Every single thing that you do is going to make a difference to your life and to the planet and to everyone around you. And remember that there is so much help available that you can just ask the angelic realms and they will smooth out your life and help you.

And if you're going through a challenge, your soul wants you to learn something. So, just learn it and move onward and upward. We are going into an incredible new Golden Age. Enjoy it.
